

ADVISORY LEVEL: Important

DESCRIPTION: In-Line Oil Filter

ENGINE TYPE: R2800 / R3600

INSTALL/SERVICE : at each 25Hr oil change.

Installation:

1. Cut the existing line between the between the bottom of the sump and the gear pump.
2. Use hose clamps to secure the filter in line (see pic) – the gold filter shown is a 3/8" good quality auto transmission filter however a power steering filter can also be used

If available the Magnefine filter is highly recommended.
